Medical Image Standardization

THE PROBLEM

In today's medical imaging department, countless hours are wasted dealing with problems that affect hanging protocols, image routing, and AI orchestration. At the core of our healthcare interoperability challenges is non-standardized clinical data.

- Series are technically identical but labeled differently, creating display and processing issues
- Series descriptions lack clinical relevance
- Different facilities label studies differently, making comparisons impossible
- Data is missing or inaccurate
- And more ...

THE SOLUTION

ENDEX transforms medical imaging data to a consistent, clinically-relevant standard nomenclature and enables relevant clinical content linkage across different IT systems. Endex enables consistent display of hanging protocols, improves image routing, and orchestration intelligence.

- Eliminate hanging protocol display issues
- Reduce manual intervention for radiologists and PACS administrators
- Improve radiologist satisfaction with your PACS
- Lessen potential repetitive stress injuries
- Enrich data with reliable, clinically-relevant labels and metadata

HOW IT WORKS

- Endex maps heterogeneous DICOM headers to a defined universal ontology
- Studies and series now appear with normalized descriptions, enabling hanging protocols to work
- Relevant, uniform descriptions facilitate faster reporting time, easily queried studies, and less frustration from radiologists
- Manual intervention is reduced by 15-90 seconds per study
- Admin staff reclaim time from mundane tasks

ENDEX WILL

- **Enhance** your workflow and increase operational productivity
- **Improve** radiologist job satisfaction
- **Reduce** your physician burnout
- **Decrease the complexities** of PACS hanging protocols
- **Expand capacity** across multiple roles
- **Help you get back to life**

ABOUT MULTI

MULTI, Inc. exists to provide access to authentic parts, service, and technology through our OEM allegiant relationships.

We have a history and passion for investing in and growing disruptive technology and software businesses that have the potential to radically improve healthcare delivery.

Our mission is to deliver superior value to both healthcare facilities and OEMs by forming collaborative partnerships that produce operational excellence and innovation. Our investment philosophy focuses on niche technology solutions that solve specific identifiable problems, make immediate impact, and drive long-term value.
